

DOROTHEUM

SINCE 1707

SAMPLE STAND

For the swivel chair from the National Council meeting hall, which was affixed to the floor by means of a pivoting metal base frame with a foot in the middle, the Parliamentary Administration created a sample stand. Once removed from its original location, the swivel chair can be used only with the addition of a stand, regardless of type; alternatively, it must be affixed to the floor again, in order to be used as a seat.

It is a 10 mm thick disc of unrefined steel, diameter 420 mm, with contrasting plugs with M8 internal thread, degreased, equipped with felt stickers on the underside in order to preserve the swivel effect.

This stand is not part of the auction, and can be purchased separately from a locksmith.

It is available in two versions at 246 € (unrefined iron) and 336 € (matt black powder-coated) respectively (incl. 20% VAT).
